

Manufacturing Automation Platform

Future-proof your factory

with modular applications running on Vention's Manufacturing Automation Platform

Fast ROI

Productized applications and self-deployment that eliminate non-recurring engineering costs and accelerate ROI.

Modular & Scalable

Platform modularity allows for high-degree of customization and easy application upgrades as your factory scales.

Field-Proven

Productized applications made of hardware and software that has been field-proven over tens of thousands of deployments.

Future-Proofed

With 100+ engineers continuously developing the Vention platform, your application will be supported over the long run.
