

# Reach further with our Robot 7th Axis

VENTION™

Extend the range of your robot with a plug & play, pinch-point-free 7th axis from Vention.

Combined with our modular parts library, our 7th axis offers more actuator types and lengths to choose from, making it the most versatile and powerful robot actuator line on the market. Each 7th axis configuration is fully compatible with FANUC, Universal Robots, Doosan, and others.

Robot-agnostic

< 8 hour assembly time

Code-free programming and  
deployment in MachineLogic

Ships in 1 to 3 days

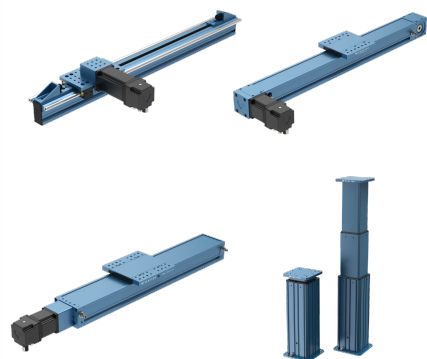

## Customize your 7th axis

Mix & match our modular parts to create a 7th axis designed to fit your unique factory specifications.

Choose from 4 possible  
configurations:

- Floor-mounted
- Overhead
- Vertical
- Telescopic

Choose from 6 different  
actuators technologies:

- Rack & pinion
- Enclosed timing belt
- Enclosed ball screw
- Enclosed lead screw
- Belt rack
- Telescopic lift column

Choose your robot &  
add-ons:

- 25+ compatible  
cobot models
- End-of-arm tools
- Plug & play safety  
devices

Choose your software or  
communication options:

- Code-free URCap
- FANUC Extension
- MQTT with  
MachineLogic
- Traditional  
programming

Extend the reach of your robot with a customized range extender.

VENTION

One cloud platform to design, automate, order and  
deploy automated equipment
